**Superheroes Wear Masks** Chris Stead,2020-12-27 Pat doesn't want to wear a mask. He's scared. Then he begins to think about people he loves and trusts that wear a mask every day and why they do. This helps Pat understand that it's okay to wear a mask if it keeps you safe.

Who's Behind the Mask? Lisa Konkol,2020-10-20 As a children's book author and illustrator, as well as a mother and grandmother, I understand that our new normal can be scary for little ones. Children are learning how to process and understand facial expressions and emotions, during a time when everyone is wearing a mask. Now the faces of their loved ones, teachers, friends, and local grocery clerks are all covered. It can be scary and confusing. Who's Behind the Mask? aims to help calm some of those fears. Each page shows an example of someone in a mask. Children can turn the page to see a smiling face underneath. Even the doggie is wearing one!

*My Mask* Nathan J Jones,2020-04-29 A delightfully simple and light story that encourages children to both appreciate and take good care of their face mask. Whether wearing a mask due to allergies, pollution, or a viral epidemic, children can view wearing a safety mask as a special and memorable experience, not something scary or detestable. A face mask like me, starts out with a special dream... and so we are invited to learn about how face masks prepare to become champions and guardians. We anxiously hope for our little hero to be chosen by the right child and by the end of the story, might even feel the need to put our own crayons to work recording some special moment we spent wearing a safety mask. Written by a father whose own child refused to wear her mask during the peak of the corona virus epidemic, the gentle and humorous picture book is narrated from the perspective of a safety mask from beginning to heart warming end. The author believes that one of our roles as parents is to help frame experiences for our children in ways that comfort, encourage, strengthen and respect their journey to understanding both the beauty and the struggles of life. (Helping children understand the epidemic) (Child therapy during the epidemic) (Reducing child anxiety due to corona virus) (Children's book about corona virus) (Using picture books in child counseling) (Positive parenting perspectives) (wearing a mask)

**Wear the Damn Mask** Izzy the Frenchie,Rick Hendrix,Shane Jordan,2020-11-17 From the feisty and fabulous “Joan Rivers of the pet influencer community” (Paper Magazine), beloved social media star and canine fashion icon Izzy the Frenchie wittily explains why it’s so important we all wear face masks to battle COVID-19. French bulldog and doggy

celebrity Izzy loves going out and about just like the rest of us, but she also knows how important it is to be stylish and safe. In *Wear the Damn Mask*, the four-legged “sassy fashion lover” (Vogue) shows how you can effortlessly be both. Featuring endearing and funny photos of Izzy accompanied by cheeky words of wisdom on when to wear your mask and how to properly social distance, *Wear the Damn Mask* is a laugh-out-loud, clever read that will help prevent COVID-19 from literally going to the dogs.

**Biomedical Signal and Image Processing** Kayvan Najarian, Robert Splinter, 2005-12-21 All of the biomedical measurement technologies, which are now instrumental to the medical field, are essentially useless without proper signal and image processing. *Biomedical Signal and Image Processing* is unique in providing a comprehensive survey of all the conventional and advanced imaging modalities and the main computational methods used for processing the data obtained from each. This book offers self-contained coverage of the mathematics and biology/physiology necessary to build effective algorithms and programs for biomedical signal and image processing applications. The first part of the book details the main signal and image processing, pattern recognition, and feature extraction techniques along with computational methods from other fields such as information theory and stochastic processes. Building on this foundation, the second part explores the major one-dimensional biological signals, the biological origin and importance of each signal, and the commonly used processing techniques with an emphasis on physiology and diagnostic applications, while the third section does the same for imaging modalities. Throughout the book, the authors rely on practical examples using real data from biomedical systems. They supply several programming examples in MATLAB® to provide hands-on experience and insight. Integrating all major modalities and computational techniques in a single source, *Biomedical Signal and Image Processing* is a perfect introduction to the field as well as an ideal reference for the established professional.

**Mask**, 2019-09-24 2020 IBPA Awards Winner! *Mask* presents a striking collection of rare masks steeped in ancient tradition, captured through the lens of one of the world’s most celebrated documentary photographers. Celebrated photographer Chris Rainier has documented indigenous and endangered cultures worldwide. What began as a focus on the masks of New Guinea—where modernity threatened to erase ancient rituals and cultures—became an expansive journey to find and photograph traditional masks that has taken Rainier across six continents over the past thirty years. The result is this mesmerizing photographic collection of masks—some of them ancient, some newer, many hidden at the edges of the known world and rarely revealed to outsiders. Traditional masks are so often seen behind the glass of museum cabinets, divorced from their spiritual significance. But the masks in this collection are still being danced today, in countless cultures all over the world. Rainier conveys them pulsing with the rhythms of life, full of power and spiritual relevance. Through his stunning photography—at once mysterious and unguarded—Rainier takes us on a pilgrimage to experience masks and mask

rituals: from those found at initiation rituals in Burkina Faso to Bön Buddhist masks long hidden in a Nepalese monastery in the high Himalayas, the raven and bear regalia of North American First Nation potlatches, and the terrifying, child-chasing Krampus masks of the Austrian Alps. Accompanying these striking images are a foreword by renowned essayist Pico Iyer, ethnographic notes from anthropologist Robert L. Welsch, and fascinating stories recounting Rainier's journeys to distant lands to preserve and celebrate these objects of beauty and power and the cultures that produce them.

**Legacy of Masks** Sallie Bissell, 2014-11-08 Ex-prosecutor Mary Crow has returned home to Pisgah County, North Carolina, three years after bringing its corrupt sheriff to justice. But the local District Attorney reneges on his promise of a job for her, and the only offer of work comes from a land developer—and former classmate—who seems to have trouble taking no for an answer. For Mary, coming home is supposed to be about renewal, about living the life she wants. She's come home to reunite with her former lover Johnny Walkingstick . . . and to reconnect with her own past. But the reality of her homecoming takes a much darker turn as she's plunged into the merciless world of a ruthless predator.

**Late Migrations** Margaret Renkl, 2019-07-09 From the New York Times columnist, a portrait of a family and the cycles of joy and grief that mark the natural world: "Has the makings of an American classic." —Ann Patchett Growing up in Alabama, Margaret Renkl was a devoted reader, an explorer of riverbeds and red-dirt roads, and a fiercely loved daughter. Here, in brief essays, she traces a tender and honest portrait of her complicated parents—her exuberant, creative mother; her steady, supportive father—and of the bittersweet moments that accompany a child's transition to caregiver. And here, braided into the overall narrative, Renkl offers observations on the world surrounding her suburban Nashville home. Ringing with rapture and heartache, these essays convey the dignity of bluebirds and rat snakes, monarch butterflies and native bees. As these two threads haunt and harmonize with each other, Renkl suggests that there is astonishment to be found in common things: in what seems ordinary, in what we all share. For in both worlds—the natural one and our own—"the shadow side of love is always loss, and grief is only love's own twin." gorgeously illustrated by the author's brother, Billy Renkl, *Late Migrations* is an assured and memorable debut. "Magnificent . . . Readers will savor each page and the many gems of wisdom they contain." —Publishers Weekly (starred review)

**Mask of the Sun: The Science, History and Forgotten Lore of Eclipses** John Dvorak, 2017-03-07 They have been thought of as harbingers of evil as well as a sign of the divine. Eclipses—one of the rarest and most stunning celestial events

we can witness here on Earth—have shaped the course of human history and thought since humans first turned their eyes to the sky. What do Virginia Woolf, the rotation of hurricanes, Babylonian kings and Einstein's General Theory Relativity all have in common? Eclipses. Always spectacular and, today, precisely predicable, eclipses have allowed us to know when the first Olympic games were played and, long before the first space probe, that the Moon was covered by dust. Eclipses have stunned, frightened, emboldened and mesmerized people for thousands of years. They were recorded on ancient turtle shells discovered in the Wastes of Yin in China, on clay tablets from Mesopotamia and on the Mayan "Dresden Codex. They are mentioned in Homer's Iliad and Odyssey and at least eight times in the Bible. Columbus used them to trick people, while Renaissance painter Taddeo Gaddi was blinded by one. Sorcery was banished within the Catholic Church after astrologers used an eclipse to predict a pope's death. In *Mask of the Sun*, acclaimed writer John Dvorak the importance of the number 177 and why the ancient Romans thought it was bad to have sexual intercourse during an eclipse (whereas other cultures thought it would be good luck). Even today, pregnant women in Mexico wear safety pins on their underwear during an eclipse. Eclipses are an amazing phenomena—unique to Earth—that have provided the key to much of what we now know and understand about the sun, our moon, gravity, and the workings of the universe. Both entertaining and authoritative, *Mask of the Sun* reveals the humanism behind the science of both lunar and solar eclipses. With insightful detail and vividly accessible prose, Dvorak provides explanations as to how and why eclipses occur—as well as insight into the forthcoming eclipse of 2017 that will be visible across North America.

[The Spiritual Power of Masks](#) Nigel Pennick, 2022-04-19 • Reveals how mask rituals are akin to shamanic journeying and allow the mask wearer to personify an ancestral presence, spirit, deity, or power • Examines animal guising and shows how mask customs are tied to creation myths and the ancestral founders of a people, tribe, city, or nation • Looks at morris dancers and mummers in the UK, Krampuslauf and Perchtenlauf in Germanic areas, the Gorgon myths of Greece, Norse Berserker rituals, and the annual Black Forest rite to awaken ensouled masks every spring There is a spiritual power in masks that transports one into realms unseen and gives voice to things unspoken. Within the context of ritual, putting on a mask places the wearer at the intersection between the present and the past, the living and the dead, this world and the Otherworld. Masks make it possible to activate ancient archetypes, with the mask wearer reanimating or personifying an ancestral presence or spirit, a deity or power, an animal or a being of the eldritch world. In this illustrated study, Nigel Pennick explores the magical and spiritual aspects of mask wearing from ancient times to the present. He examines the many mask traditions around Europe and shows how mask rituals are similar to shamanic journeying and near-death experiences and can induce ecstatic states that allow the power signified by the mask to take possession of the individual wearing it. He also looks at the practice of dressing up as sacred animals and mask wearing as it relates to ostenta, events that occur suddenly and without warning that are considered a token or sign from the Otherworld. Unveiling the sacred power of

masks, the author shows how masks allow us to transport into realms unseen, embody ancestors and otherworldly entities, and connect with traditions that stretch back to time immemorial.
