Jeep Cherokee XJ Performance Upgrades 2015-04-15

The Jeep Cherokee XJ is a pioneering SUV that delivers commendable performance and off-road capability. More than 3 million Cherokee XJs were manufactured during its production run. However, when the XJs rolled off the production lines, they were built primarily for the street. As a result, XJs need crucial modifications and high-performance upgrades to make them better for off-road duty.

In this updated edition, author and veteran Cherokee expert Eric Zappe guides you through each stage of an XJ build so you can take the mild mannered bone stock XJ and upgrade it to a capable off-road performer. Zappe delves into suspension bolt-on improvements, including lift kits to increase ground clearance and suspension travel. He also covers high-performance shocks and long-arm suspensions. Wheels and tires are your vital link to the terrain, and he reveals all the important considerations so you select the right combination.

XJs need a heavy-duty steering system to negotiate challenging off-road conditions, and Zappe explains several ways to upgrade the steering. Driveline and axle upgrades are an important part of the performance equation, so these performance improvements are covered as well. He doesn't stop there; he also explores engine performance improvements for the 2.5, 2.8, 4.0-liter engines. So the Cherokee has more power for off-road performance.

In addition, he covers some basic tips for body strengthening and adding skid plates. If you're ready to go off-road with your Cherokee but you're not planning to build a top-dollar off-road machine, this is the book for you. With the techniques and latest products described in this book, you will be able to upgrade your XJ to much higher levels of performance, and your XJ will be at home off and on road.

life can help a young man gain the necessary self confidence to overcome life's obstacles. The author describes many of the men he worked with on a daily basis and how humor can be found in all walks of life. The writer also gives insight into his personal life as he struggled to support his family.

Today's Coast Guard is a far cry from those lean years in the 1960s. The other guardians who read this memoir will recognize the great differences in technology between then and now. Life was different when the author served his ten years active duty as a coast guard. Air-conditioned vessels were far between isolated duty tours on loran stations and lighthouses were common. Many of the enlisted personnel qualified for food stamps but very few would apply. Medical care was sparse unless you were stationed near a military installation with those medical facilities or a public health service hospital work uniforms for enlisted up to and including E6 were chambray shirts, bell bottomed dungarees, and a blue ball cap or white hat. Dress uniforms were either dress blues of bell bottomed trousers and a jumper with white piping or a white uniform of the same except no piping and a white hat. The author describes a few situations and conditions that give a very small overview of the older coast guard in 1960. The coast guard was under the U.S. Treasury Department later it was moved to the newly formed Department of Transportation. Some called this department a wet NASA. The orange slash was added to floating units and aircraft about 1968 now the guardians are under the umbrella of the Department of Homeland Security. As we all know, if war is declared the CG will go under the good ole U.S. Navy and the Department of Defense. The author was proud to have served as a guardian and he is proud of you men and women who are now serving those he has had the pleasure of meeting and serving with. Today's coast guard are generally more aware of the world situation and are certainly better trained than we were. Semper Paratus: always ready is what we want to be as one of the armed forces of the United States of America. I always pray that God will bless you in your service to keep us safe and free.

Searching for even more wild places and new experiences, Dan became determined to explore off the map in Africa from the mighty Sahara Desert in the north to the dense equatorial jungles of the Congo and the open grasslands of Southern Africa. Dan turned his biggest dream into reality over the course of three years. Dan's second major expedition spanned fifty-four thousand miles through thirty-five unique African countries. The adventure was a thousand times bigger than he dreamed possible after exploring the Pan-American Highway from Alaska to Argentina. Dan became hooked on the freedom of global overland travel and wanted more. New languages, exotic foods, stunning landscapes, and local people with a completely different outlook became Dan's everyday life. As the months turned into years through highlights and despair, Dan gained a new appreciation for what it truly means to be alive. Viewing our modern world through African eyes gave Dan a new perspective, and he was pulled in by the endless joy, laughter, and kindness at every turn. While the landscapes and wildlife are undeniably breathtaking, it is the natural warmth of the African people that is truly unforgettable. All across the continent, Dan was welcomed with love and generosity, and now he will never be the same.
